

What I claim is:

1. (currently amended) A shade and rain umbrella combination including a basic umbrella having a shaft and expanding ribs at a top of said shaft, a shade cover placed over said ribs and fastened to a peripheral point at the end of said ribs, said shade cover consisting of a woven mesh fabric for protection against ultraviolet rays of the sun but at the same time allowing ventilation air to pass through said fabric, a separable water proof rain cover is placed over said shade cover in the event of rain, said rain cover is substantially the same size as said shade cover, means for fastening said rain cover to said peripheral point at each of the ends of said ribs, whereby said shade cover is used in sunshine and said rain cover is added in the event of rain but kept separate otherwise.

2. (withdrawn) The umbrella combination of claim 1 including means for storing said rain cover within said shade cover when not in use.

3. (withdrawn) The umbrella combination of claim 1 including means for storing said rain cover on said handle of said umbrella.

4. (original) The umbrella combination of claim 1, wherein said means for fastening are flexible eyelets on said rain cover placed over each point at each end of said ribs.

5. (withdrawn) The umbrella combination of claim 1, wherein said means for fastening is a snap fastener combination.

6. (withdrawn) The umbrella combination of claim 1, wherein said means for fastening is a hook and loop fastener combination.

7. (withdrawn) The umbrella combination of claim 1, wherein said means for fastening are rigid eyelets on said rain cover placed over each point at the end of each of said ribs.

8. (withdrawn) The umbrella combination of claim 1 including means on said shaft for extending its length.

9. (original) The umbrella combination of claim 1 including means for clamping said shaft in an upright position on an object.

10. (original) The umbrella combination of claim 9, wherein said means for clamping has a form of a C-shape clamp.

11. (original) The umbrella combination of claim 10, wherein said C-shape clamp has means thereon for orienting and clamping said C-shape clamp in two different directions.

12. (withdrawn) The umbrella combination of claim 1 including a casing for storing said umbrella combination when not in use.

13. (withdrawn) The umbrella combination of claim 12 including a pocket attached to said casing for storing said rain cover therein.

14. (withdrawn) The Umbrella combination of claim 12 including a pocket attached to said casing for storing a clamp therein.

15. (withdrawn) The Umbrella combination of claim 1, wherein said shaft has a pointed bottom end for the shaft to be driven into the ground for stability.

16. (currently amended) The umbrella combination of claim 1, wherein said shade cover is constructed of a knitted fabric including a HDPE polyethylene mono-tape.
